

# AARYAN KV

Associate Consultant | Oracle

## CONTACT

Bengaluru, India 560040

**Mobile:** +91-9886099660

**Email:** kvaaryan@gmail.com

**Portfolio:** www.aaryankv.in

**LinkedIn:** linkedin.com/in/aaryankv

**GitHub:** github.com/aaryankv

## SKILLS

### Programming & Backend:

Java, Python, PL/SQL.

### Enterprise & Cloud Platforms:

Oracle FLEXCUBE, RAD, AWS, Google Cloud (GCP).

### Web & UI Technologies:

React, HTML, CSS, JavaScript, Oracle JET (OJET).

### Databases & Data:

Oracle Database, PLSQL, MongoDB

### Core Engineering Concepts:

Data Structures & Algorithms, REST APIs, SOAP/XML, Java Web Services.

### AI / ML:

Machine Learning, Generative AI, LLMs, Prompt Engineering, AI Agents.

## EDUCATION

**Bachelor of Technology:** Artificial Intelligence & Machine Learning

**B N M Institute Of Technology,**  
Bengaluru, India

- CGPA : 7.91/10

## CERTIFICATIONS

**Agentic AI Certified Foundations**  
Associate - Oracle

**PwC Launchpad- Cloud & Digital,**  
PwC

**Strategy Formulation and Data**  
Visualization, IIT M

## LANGUAGES

English      Kannada

Hindi      Telugu

## PROFESSIONAL SUMMARY

Software development professional with experience in enterprise application customization, backend development, integration and automation. Currently an Associate Consultant at **Oracle**, working with **Java, PL/SQL, Web Services and Oracle FLEXCUBE**. Previous experience at **PwC** and **eMpulse Global** includes cloud integration, machine learning, computer vision and data processing, supported by projects in full-stack development and workflow automation.

## PROFESSIONAL EXPERIENCE

**Associate Consultant, Oracle, Bengaluru**

**August 2025 – Present**

Developed new features and product customizations for **Oracle FLEXCUBE** using **Java, PL/SQL and RAD tools**, translating banking requirements into application changes and business validations.

Supported product upgrades by reviewing release enhancements, existing customizations and configuration requirements, helping identify changes requiring further validation.

Built **Ticket Pulse**, an internal ticket-monitoring prototype that consolidates support and engineering issues through API integration, automated status checks, dashboards and change history.

**Advisory Intern, PwC (PricewaterhouseCoopers), Bengaluru**

**February 2025 – August 2025**

Designed and implemented **cloud and hybrid integration workflows** using **Boomi and MuleSoft** for enterprise application integration. Collaborated with cross-functional teams to understand client integration requirements and deliver scalable workflows across enterprise environments.

Developed an AI agent that converted integration specifications into implementation plans covering APIs, data mappings, validations and test scenarios for Boomi and MuleSoft workflows.

**Machine Learning Intern, eMpulse Global, Bengaluru**

**November 2023 – February 2024**

Developed sales-forecasting and computer-vision models using **Python, TensorFlow and Keras**. Built data-processing pipelines with **Pandas and NumPy** to prepare datasets for modelling and created **Streamlit dashboards** to visualise results and enable interactive analysis.

**Industrial Vision AI System:** Built a real-time detection and counting system using **YOLOv8, OpenCV and Flask**, achieving **98% tracking accuracy** and automating tasks previously handled by two full-time operators.

## PROJECTS

### Ticket Pulse - Internal Tooling Prototype

Next.js | React | PostgreSQL

Built a dashboard to track linked support requests, engineering defects and Jira issues, including ticket details, comments, status snapshots and change history. Integrated **Jira REST APIs** and browser-based monitoring with scheduled refreshes, failure handling and automated tests for application workflows.

### Banking Management System

Java | Oracle JET | Oracle Database | PL/SQL

Developed a multi-tier banking web application supporting customer and employee account management. Connected Java backend components and Oracle JET interfaces with PL/SQL packages and procedures to implement application and database workflows.
